# Quality of Information

In nature, and in every biological system, the quality of information as well as energy fields, which create matter (as documented by over 100 years of quantum physics) plays the most important role in maintaining proper functions and balance.

QUANTUM SPANNER

"In a few decades scientists have gone from a conviction that there is no such thing as an energy field around the human body, to an absolute certainty that it exists.

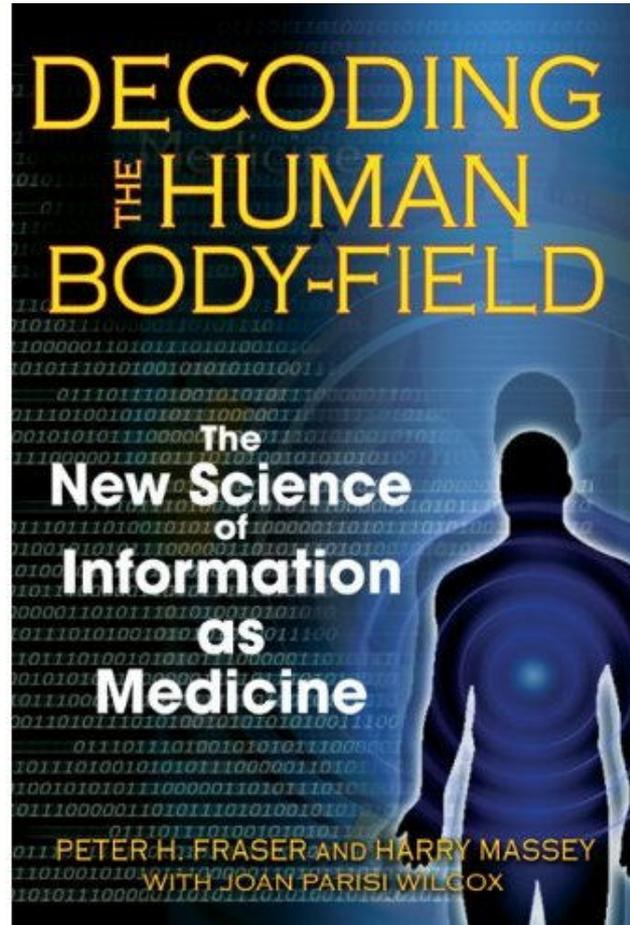

Moreover, science is explaining the roles of energy fields in health and disease.."

~ JAMES OSCHMAN, PHD

QUANTUM SPANNER

It is no secret that human body is much more than just physical matter.

The source of imbalance and disease is due to an obstruction of information in the bio-energetic field and is proven through the research of Peter Fraser in his book “Decoding the Human Body Field”.

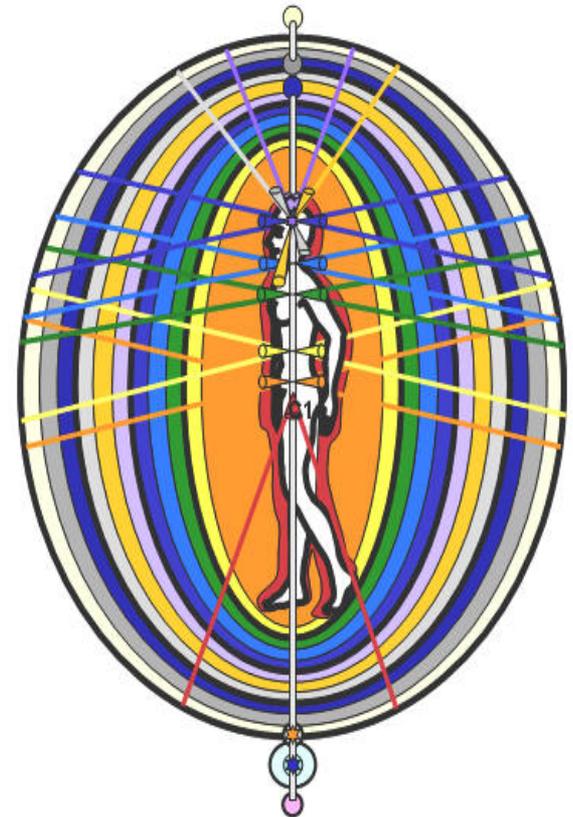

# Morphogenetic Field Physics

The health of a human being is directly related to and affected by the the greater unified field and its' systems of function.

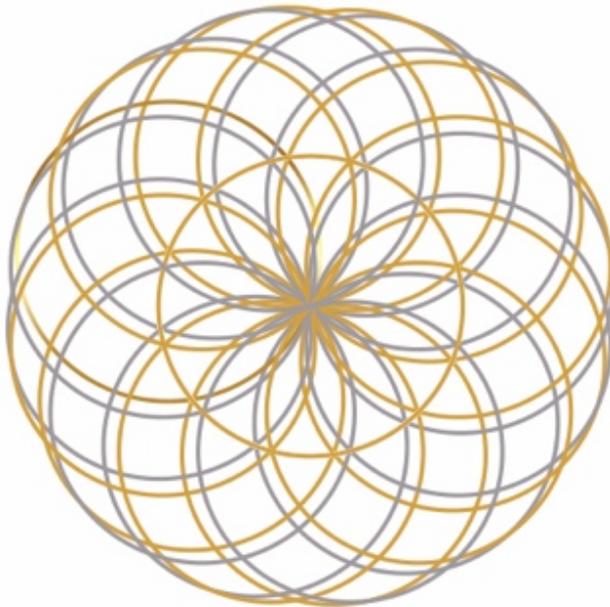

In order to better comprehend and actually facilitate the preventative health and self-healing of ALL biological organisms, it is vital to understand the fundamental order and function of the Greater Unified Field.

The context of which life itself occurs.

# What is the Unified Field?

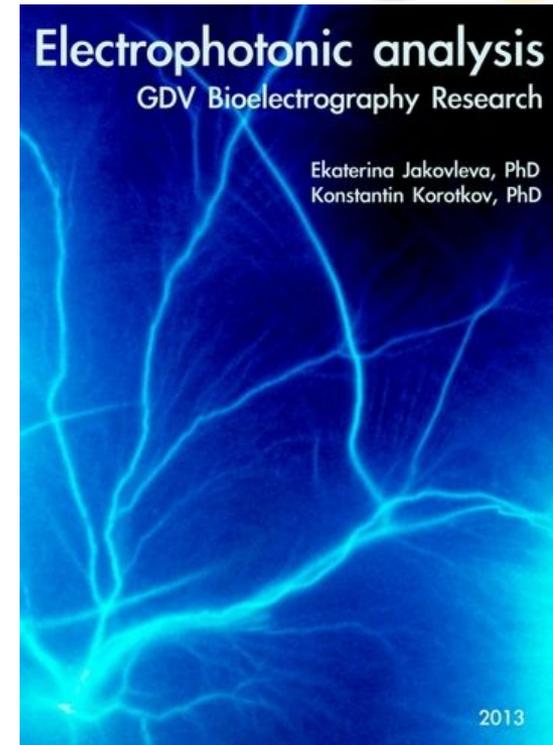

The Unified Field is the living energy substance composed of geometrical "fabrics" or grids of electro-tonal, electromagnetic energy called Source Particle Grids that serve as a template of light spectra and sound tones upon which particle (SP+) and antiparticle (SP-) structures are formed and through which all things in the cosmos are energetically connected.

- Encryption is a set of vibrations that hold intention. Lattice is an interwoven framework of energy (geometric patterns).
- The “cumulative sum of the frequency-vibration” of the core Encryption Lattice at any given moment is called the “Base Pulse Rhythm” or “BPR.”
- It is the “BPR” of the morphogenetic field Encryption Lattice that draws a manifest form to the cumulative energetic consequence corresponding to the “BPR” of its Encryption Lattice.
- The reality of WHO and WHAT you are IS the energetic truth in frequency-vibration held within your Encryption Lattice.

- Our encryption lattices is a sound pattern.
- The human body is sensitive to sound because of this.

# Dis-Ease = Vibrational Dissonance

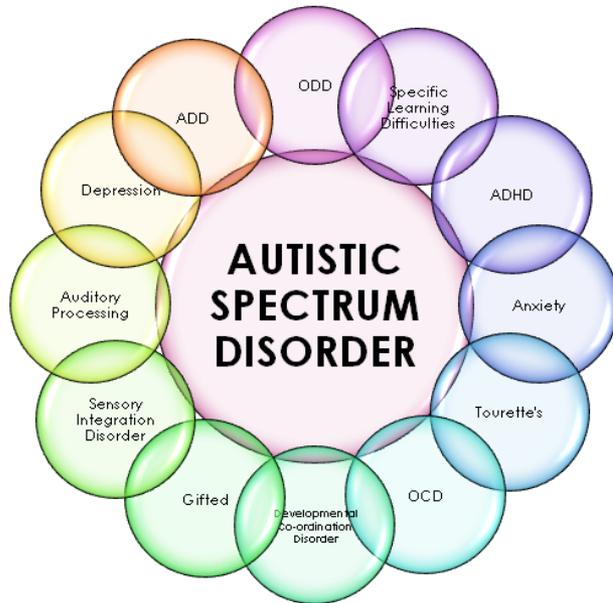

- All conditions of disease, conflict, pain, anguish, and suffering are the direct result and manifestation of vibrational dissonance of individual consciousness within the Greater Unified Field.
- The collective vibrational dissonances (called Miasmatic Body) within the morphogenetic field become holographically projected into the body, mind and 3-Dimensional life experience through the inherent natural laws of multi-dimensional energetic manifestation.
- These distortions are known as Miasms and the repeated 'outplay' of these vibrational dissonances or distortions is called "Karma".

# Scalar Wave Distortion

**Autism Spectrum Disorder (ASD)** is a miasm (scalar wave distortion) caused by EPIGENETIC factors within the templates of the DNA strand (which physically manifest as genetic distortions) and can be systematically realigned with the scalar vortex-sound-inert noble gas technology.

# Epigenetic Overlay (EGO)

The Epigenetic Overlay (EGO - Epigenetic Overlay) is the "chemical control sheath," which covers and controls the function of the DNA strands.

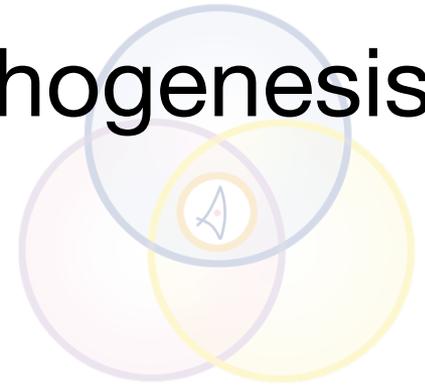

What are Epigenetic?

The root "epi" means "on top of." Epigenetics are the bio-chemical mechanisms that lie overtop of our genomes. They are responsible for activating or deactivating different characteristics or expressions of our genes, without changing the actual DNA structure. In other words, they determine which genetic characteristics will—or won't—develop, and to what degree.

# Morphogenesis

Morphogenesis: (from the Greek '*morphe*' and 'genesis' creation, literally 'beginning of the shape' is the biological process that causes an organism to develop its shape.

# Morphogenetic Imprint

**All matter forms and forms of consciousness**, including planetary and human bodies, are manifested through a **morphogenetic (form-holding)** imprint, which exists as a quantity of crystalline, electro-tonal energetic substance that is composed of specific patterns of frequency.

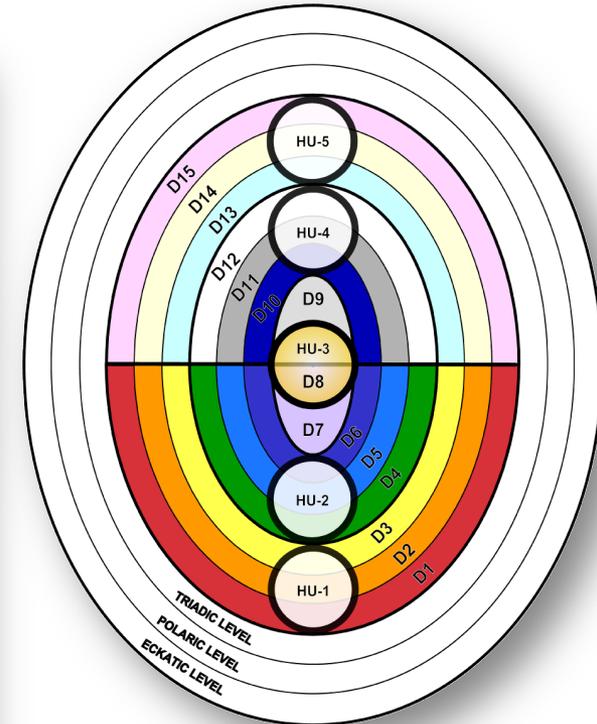

# Patterns of Frequency

Forms come into manifestation and evolve, as **patterns of frequency** are drawn into the forms' morphogenetic field, from the dimensional frequency bands of the Unified Field of energetic substance within which the morphogenetic field is placed.

**Abstract**—It will be shown that scalar waves, which normally remain unnoticed, are very interesting in terms of their practical use for information and energy technology because of their special attributes. The mathematical and physical derivations are supported by practical experiments. The demonstration will show the following: (1) the wireless transmission of electrical energy, (2) the reaction of the receiver to the transmitter, (3) free energy with an over-unity-effect of about 10, (4) transmission of scalar waves with 1.5 times the speed of light, and (5) the inefficiency of using a Faraday cage to shield scalar waves.

### Tesla Radiation

Herein is described extraordinary science: five experiments, which are incompatible with textbook physics. Following my short lecture I will present you with the transmission of longitudinal electric waves.

It is a historical experiment, because 100 years ago, the famous experimental physicist Nikola Tesla measured the same wave properties as I. From him stems a patent concerning the wireless transmission of energy (Tesla, 1900). Since he also had to find out that much more energy arrives at the receiver than is taken up by the transmitter, he spoke of a “magnifying transmitter.”

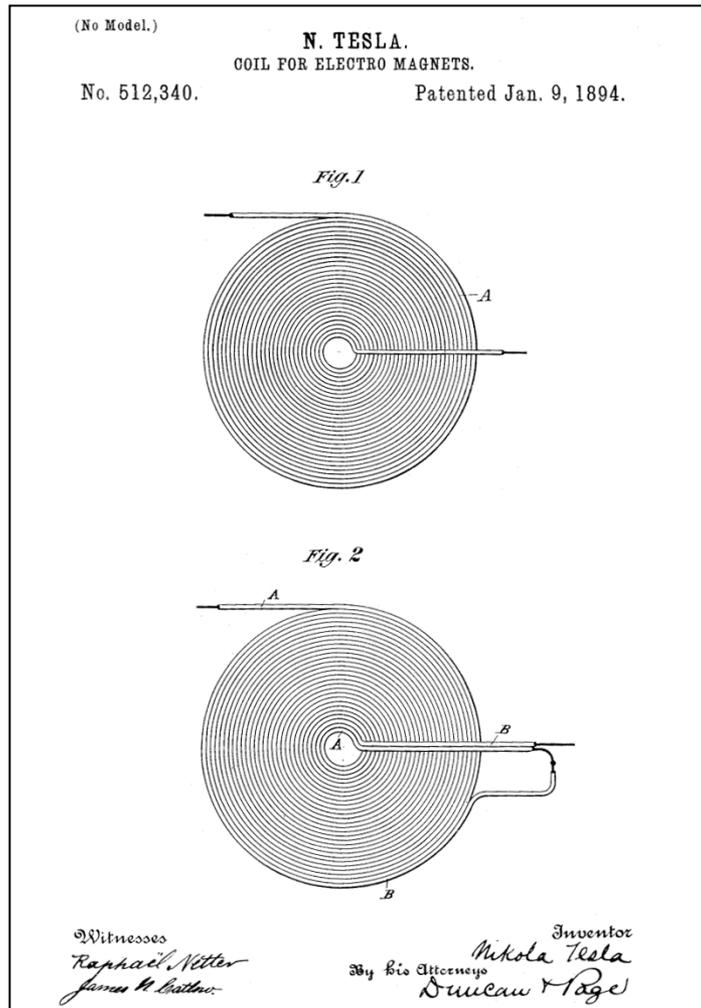

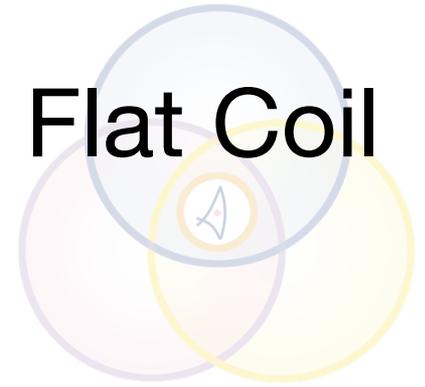

Based on the effect back on the transmitter that Tesla sees, Tesla has found the resonance of the earth and that lies, according to his measurement, at 12 Hz. Since the Schumann resonance of a wave, which goes with the speed of light, lies at 7.8 Hz, however, Tesla comes to the conclusion that his wave has 1.5 times the speed of light (Tesla, 1905).

As founder of the diathermy, Tesla had already pointed to the biological effectiveness and to the possible use in medicine. The diathermy of today has nothing to do with the Tesla radiation; it uses the wrong wave and as a consequence, it hardly has medical importance.

The discovery of Tesla radiation is denied and isn't mentioned in the textbooks anymore. For this there are two reasons: (1) No high school has ever rebuilt a “magnifying transmitter.” The technology simply was too costly and too expensive. For this reason, the results have not been reproduced, as is im-

# Tesla Flat Coil

In 1894, Nikola Tesla patented his Tesla Flat Coil (patent no. 512, 340) for electromagnets.

# Tesla Coils = Scalar Energy

Tesla coils are capable of generating “longitudinal” scalar waves that can transmit energy and information:

- Over long distances without the loss of any power
- Through solid metal boxes (Faraday Cages)
- Produce “overunity” gains of energy

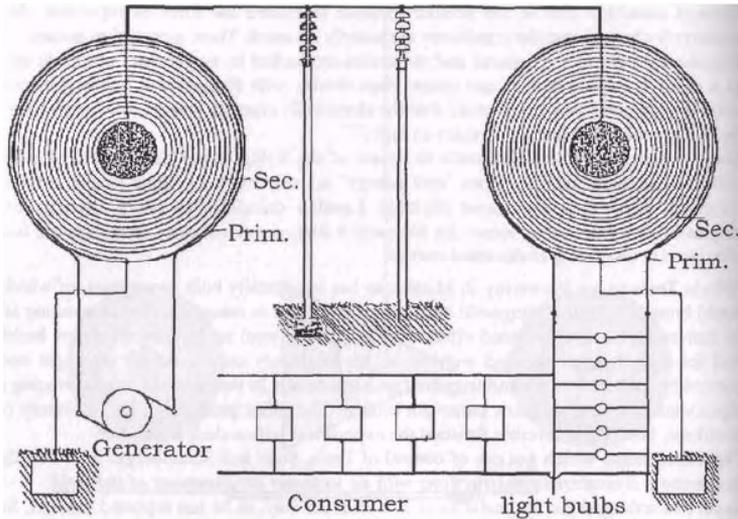

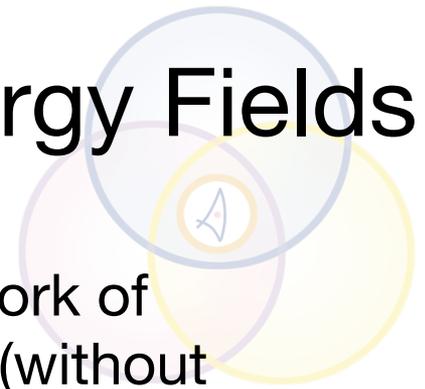

Fig. 9.5: Energy transmission bound to a wire,  
Patent No. 593,138 (1897) of Tesla.

# Scalar Energy Fields

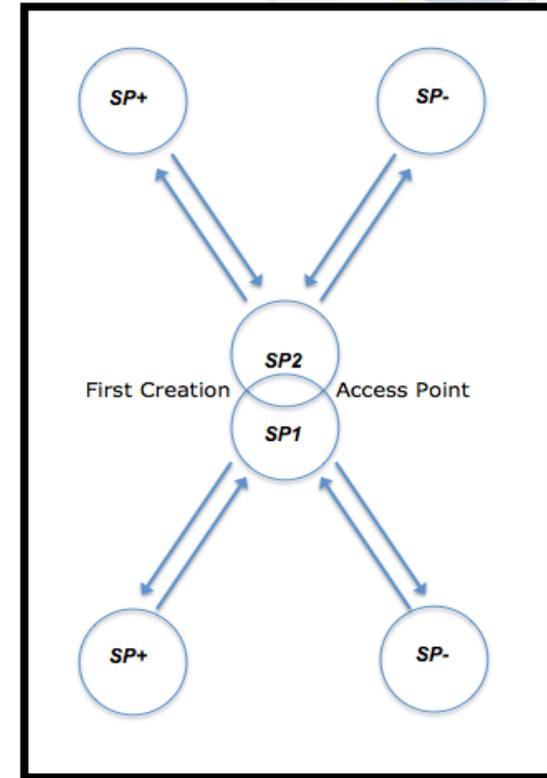

- Scalar Fields (or scalar energy) are the framework of quantum mechanics and non-Hertzian energy (without frequencies), referred to as standing energy or cosmic waves, or zero-point energies.
- Scalar waves are postulated to be subtler than X-rays or gamma rays - only one hundred millionth of a square centimeter in width.

- Due to my near-death experience, my understanding of scalar energy is more multidimensional than what modern science knows and believes.
- A scalar wave (or energy) is a multi-dimensional, standing wave pattern that emanates out of a fixed point of sound-tonal vibration within the morphogenetic field of the cosmic unified field of energy.
- Scalar Waves represent fixed points of perpetual fission and fusion that emanate from the fabric of morphogenetic fields.

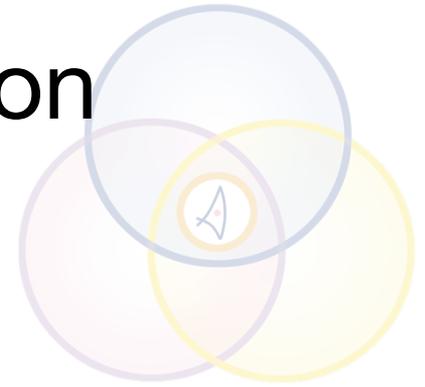

# Scalar Wave

The self-generated fission-fusion process of SP1

# Fission & Fusion

- Fission: **(Expansion)**

Etymology: Latin fission-, fissio, from findere to split

1 : a splitting or breaking up into parts

2 : reproduction by spontaneous division of a body into two or more parts each of which grows into a complete organism

3 : the splitting of an atomic nucleus resulting in the release of large amounts of energy

- Fusion: **(Contraction)**

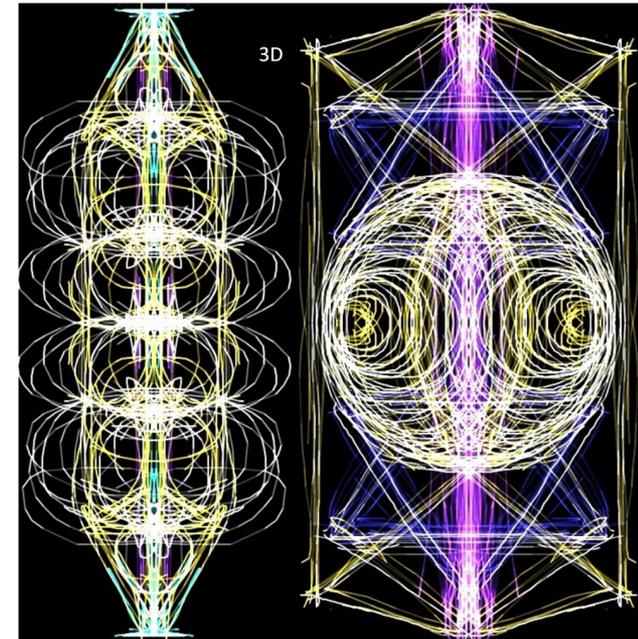

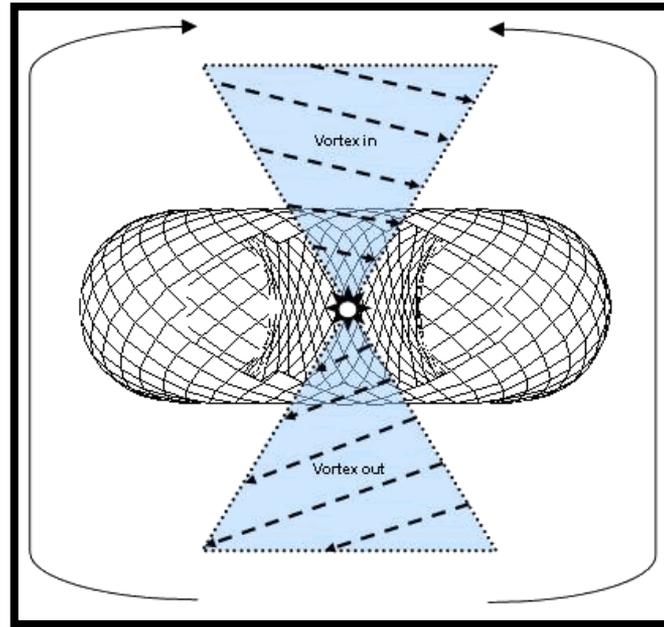

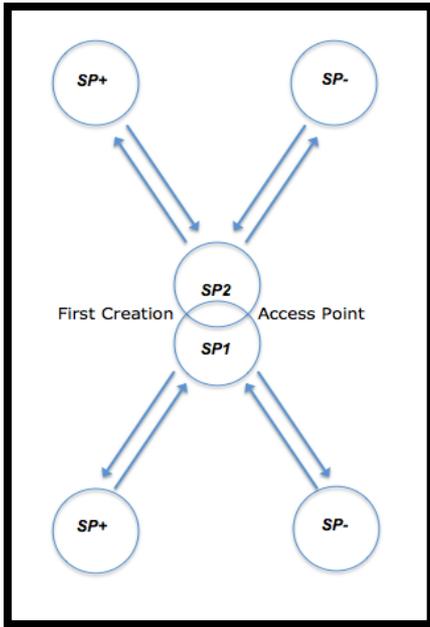

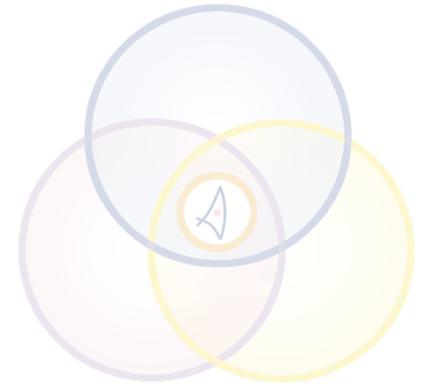

Etymology: Latin fusion-, fusio, from fundere

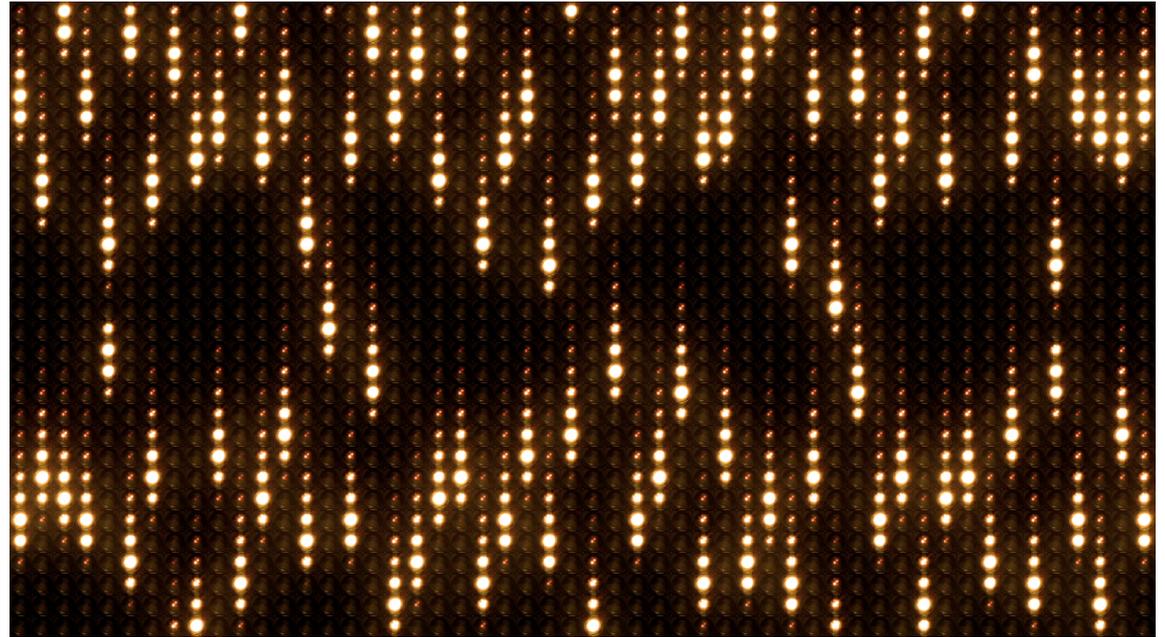

1 : a union by or as if by melting.

2 : a merging of diverse, distinct, or separate elements into a unified whole

The expression of the scalar wave movement is created through the sequential “flashing on” (light) and “flashing off” (sound) of scalar wave points, which emanate the effect of a flashing linear series of light bulbs.

Imagine a row of a synchronized series of flashing light bulbs that appears as if the light moves from one point in the row to another.

# Creating Scalar Energy

Scalar energy is accessed when two electromagnetic waves come together from two opposite converging vectors.\*

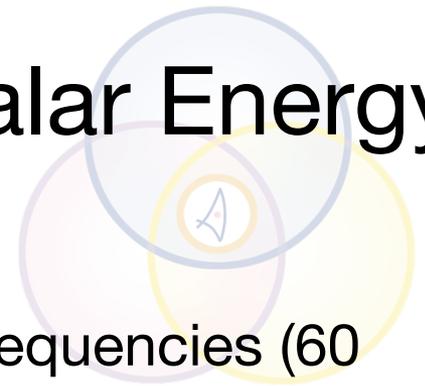

When the energy vectors meet, the equal frequencies cancel each other leaving a standing or stationary energy field.\*\*

This space the scalar energy occupies is not a vacuum but alive with checked and balanced energies as there is a continuous energy flow in this active vacuum in the form of scalar electromagnetic pairs. \*\*\*

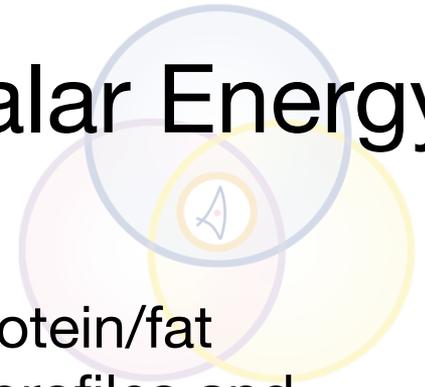

# Benefits of Scalar Energy

- Eliminates or nullifies the effects of manmade frequencies (60 cps) in the human body – Electrosmog & Geopathic Stress
- Increases the energy level of every single cell in the body to the ideal 70-90 millivolt range,
- Protects your DNA from damage,
- Increases the energy covalent level of every single hydrogen atom in the body, which hold your DNA as verified by spectrographs.
- Improves cell wall permeability thus facilitating the intake of nutrients into each and every cell and the elimination of waste from each and every cell,

# Benefits of Scalar Energy

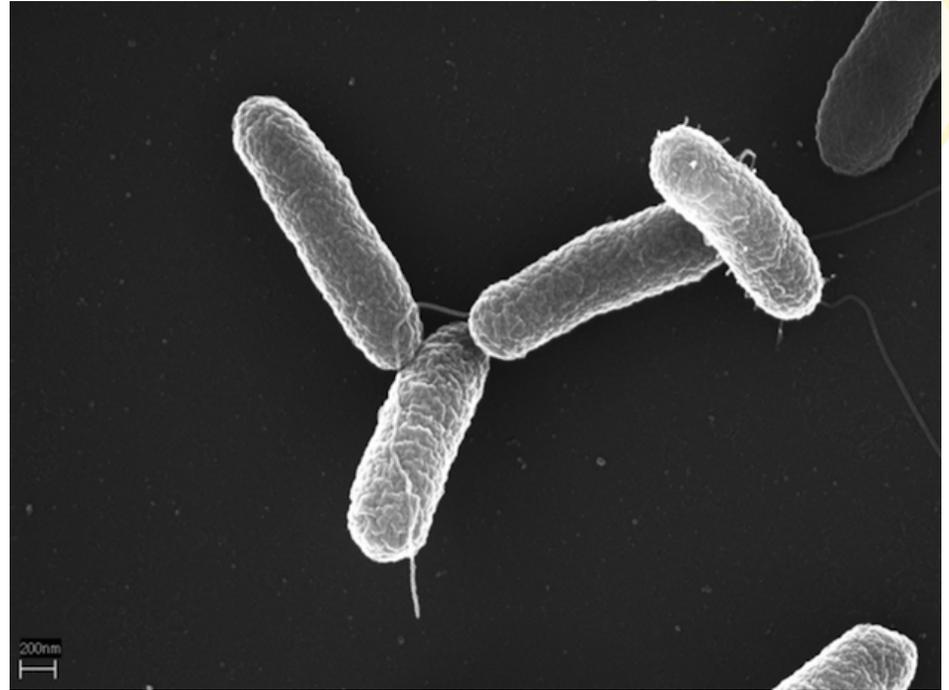

- Cleanses the blood, improving chylomicron (protein/fat particles floating in the blood) and triglyceride profiles and improves fibrin patterns,
- Improves immune function by as much as 149% as proven in laboratory studies,
- Improves mental focus and balance the hemispheres of the brain as demonstrated through EEG analysis,
- Balance out the two hemispheres of the brain, again as measured by EEG tests.
- Functions as an antidepressant since it inhibits the uptake of noradrenaline by PC12 nerve cells,

At the Max Planck Institute in Germany, a scientist named Dr. Puharich conducted a study wherein *E. coli* microorganisms were exposed to 8.00 Hz scalar fields that increased activity of the RAD-6 gene, which codes for proteins involved in DNA repair.

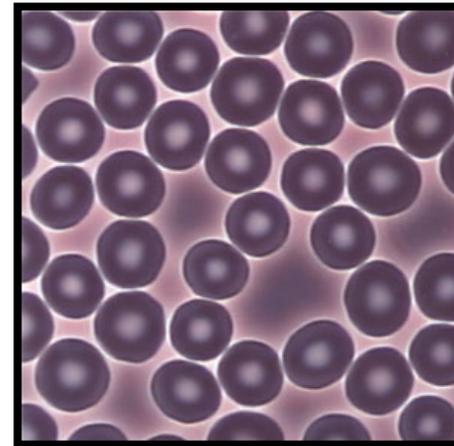

# Lab Tests

Lab tests have also indicated that red and white blood cells tend to accumulate together during illness, injury or poor health. Scalar energy “un-glues” the cells while circulation is vastly improved in lymphatic and cardiovascular systems to flow smoothly.

ALTERNATIVE SCIENCE

*Recent Russian Research Turns Up New Evidence in Support of Ancient Wisdom*

## Is DNA Influenced by the Spoken Word?

• BY GRAZYNA FOSAR & FRANZ BLUDORF

New research suggests that human DNA is a virtual biological Internet and superior in many aspects to the artificial one. Could the latest Russian scientific findings help to explain phenomena such as clairvoyance, intuition, spontaneous and remote acts of healing, self healing, affirmation techniques, unusual light, auras, spiritual masters, the mind's influence on weather patterns and much more? The answer may be yes, and apparently there is even evidence for a whole new type of medicine in which DNA can be influenced and reprogrammed by words and frequencies without cutting out and replacing single genes.

Only 10% of our DNA is being used for building proteins. It is this subset of DNA that is of interest to Western researchers and is being examined and categorized. The other 90% has been called "junk DNA." The Russian researchers, however, convinced that nature is not dumb, joined linguists and geneticists in a venture to explore the "junk" 90% of DNA. Their findings and conclusions are being called revolutionary!

According to the research, human DNA is not only responsible for the construction of our bodies but also carries out data storage and communication functions. The Russian linguists found that the genetic code, espe-

cially in the apparently useless 90%, follows the same rules as all our human languages. To verify this they compared it with the rules of syntax (the way in which words are put together to form phrases and sentences), semantics (the study of meaning in language forms) and the basic rules of grammar.

They found that the alkalines of our DNA follow regular grammar and have set rules just like spoken languages. The implication seems to be that human languages have not appeared randomly but are, in fact, a reflection of our inherent DNA.

Russian biophysicist and molecular biologist Pjotr Garajev and his colleagues also explored the vibrational behavior of the DNA ([http://www.soulsdistortion.nl/SODA\\_chapter6.html](http://www.soulsdistortion.nl/SODA_chapter6.html)). The conclusions are complicated but the bottom line was: "Living chromosomes function just like solitonic/holographic computers using the endogenous DNA laser radiation."

The scientists managed, for example, to modulate certain frequency patterns onto a laser ray and with it influenced the DNA frequency and thus the genetic information itself. Since the basic structure of DNA-alkaline pairs and of language are of the same structure, no DNA decoding is necessary. One can simply use words and sentences of the human language!

This, too, was experimentally proven! Living DNA substance (in living tissue, not in vitro) will always react to language-modulated laser rays and even to radio

waves, if the proper frequencies are being used. These results scientifically explain why affirmations, autogenous training, hypnosis and the like can have such strong effects on humans and their bodies.

It is entirely normal and natural for our DNA to react to language. While Western researchers cut single genes from the DNA strands and insert them elsewhere, the Russians enthusiastically worked on devices that can influence the cellular metabolism through suitable modulated radio and light frequencies and thus repaired genetic defects.

Garajev's research group succeeded in proving that with this method chromosomes damaged by x-rays, for example, can be repaired. They even captured information patterns of a particular DNA and transmitted it onto another, thus reprogramming cells to another genome. For example, they were able to successfully transform frog embryos to salamander embryos simply by transmitting the DNA information patterns!

By this method the entire information was transmitted without any of the side effects or disharmonies encountered when cutting out and re-introducing single genes from the DNA. The implications seem revolutionary, to say the least! All this by simply applying vibration and language instead of the archaic cutting-out procedure! The experiment underscores the immense power of wave genetics, which clearly exercises greater influence on the formation of organisms than the

Continued on Page 59

According to Russian scientists Grazyna Fosar and Franz Bludorf, the human DNA is likened to a biological Internet that can be influenced and reprogrammed by sound frequencies such as words without the primitive way of cutting out and splicing genes.

# Nature abhors a vacuum

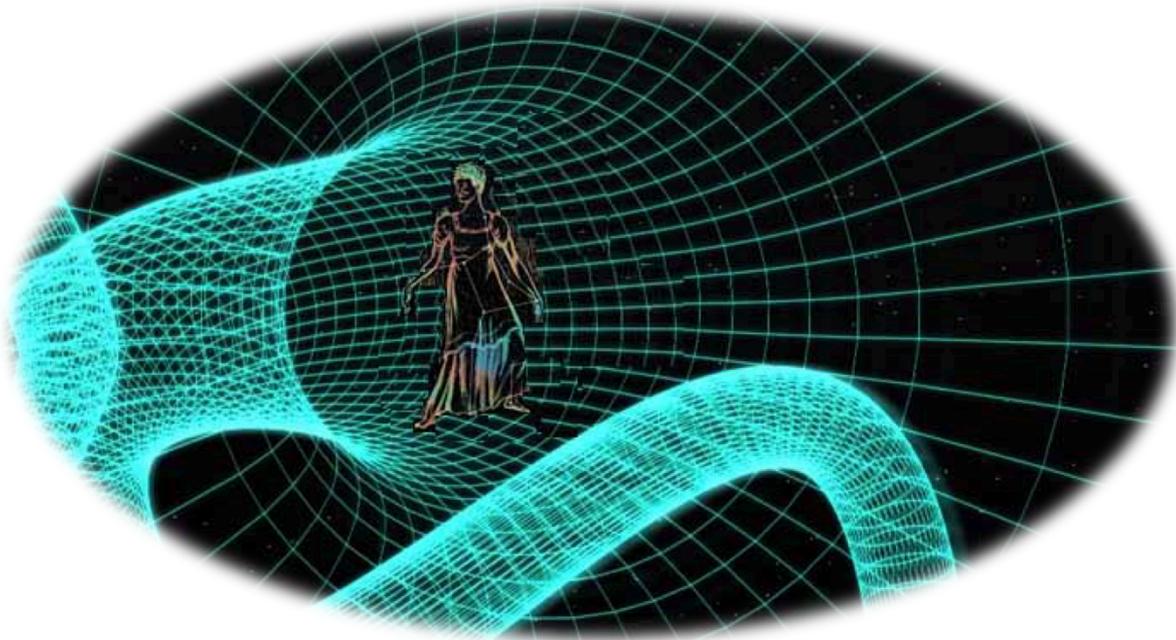

- Our DNA is a coil but it is not comprised of two helices but from three with the third helix being invisible and occupying a displacement space called the **Major Groove** which is located in between the two helical strands.
- Scientists know this as a **magnetic field** or the **major groove of DNA** which are made up of phosphates with negative charge and associated field.
- This Major Groove is not empty but instead is where all information for the genetic coding of life exists.

# DNA produces wormholes

The Russian scientists also discovered that our DNA could cause disturbing patterns in the vacuum, thus producing magnetized wormholes. Wormholes are the infinitesimal equals of the supposed Einstein-Rosen bridges in the locality of black holes.

# We can move disease out of the body!

- Diseases are distorted geometric lattice structures docking up with one another.
- This is how replication occurs.
- By reprogramming the field, you can move DNA & place it into its proper resonance; thereby steering disease out of the body!
- Diseases can be controlled by enabling selective cutting and splicing of genetic sequencing at cleavage and receptor sites

# DNA Communicates via Scalar

magnetic scalar wave (longitudinal):

Electric ring vortices form a magnetic wave.

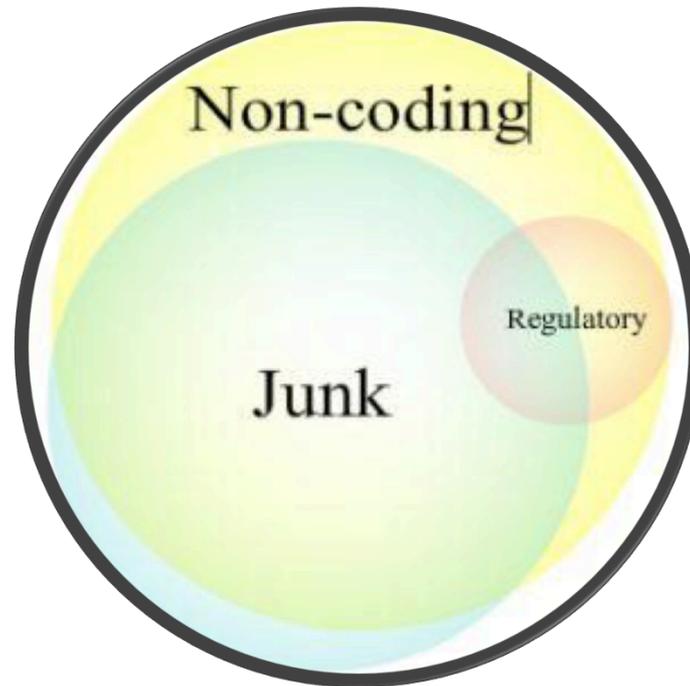

Cellular communication between cells occurs when one cell sends the read information and imprints it to the other cell.

How does genetic information travel from one cell to another?

# DNA Communicates via Scalar

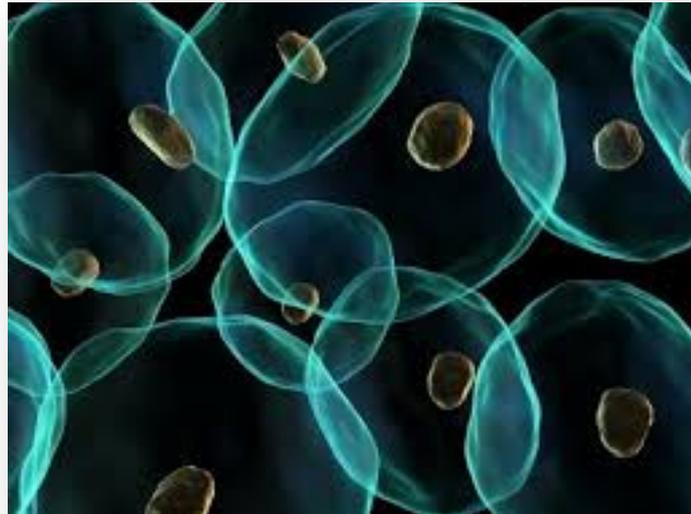

Meyl confirms, “The coding regions in the DNA strand, the genes, make up only a fraction of the total amount of DNA. The stretches that flank the coding regions are called introns and consist of non-coding DNA. Introns were looked upon as junk in the early days”.

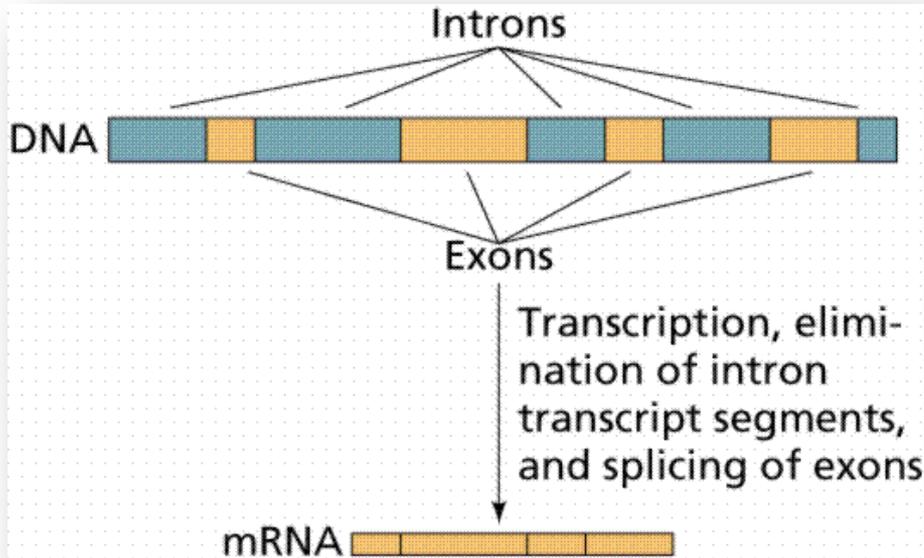

# Epigenetics

- In the presence of scalar waves, DNA cells tend to resonate with each other as they attract information and energy from other cells and their environment.
- If both transmitter and receiver cell are in bioresonance, then both information and energy are in homeostasis.

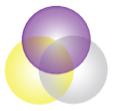

# Introns – Information Carriers

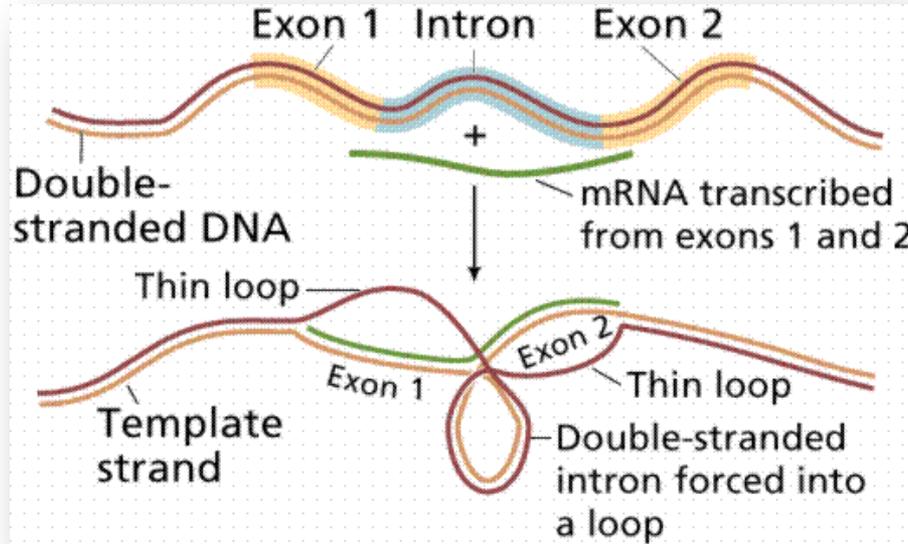

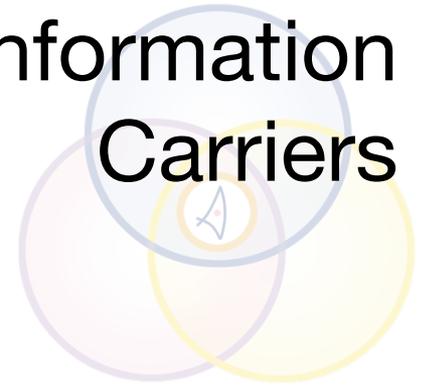

However, if the transmitter cell does not find a receiver cell to resonate with, DNA code encryption would be impossible.

To prevent this from occurring, there must be neutral cells that are not encrypted and do not have to transmit information.

# Introns – Information Carriers

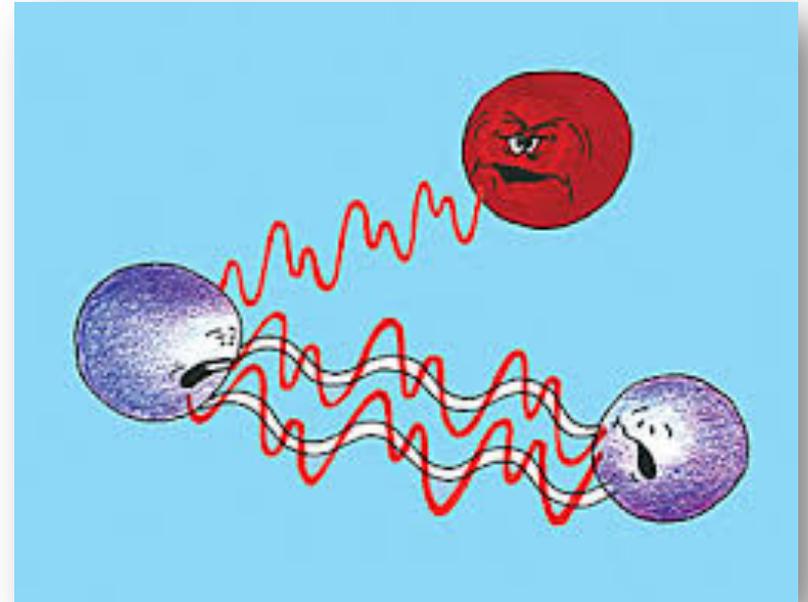

It is due to the introns that a scalar wave can potentially be formed in between two identical segments of two cells.

# Bioresonance Restriction

This suggests balanced energy conditions on both ends but if the original information were dissimilar, the gene coding would be drawn to the receiver from the sender cell causing bioresonance restriction.

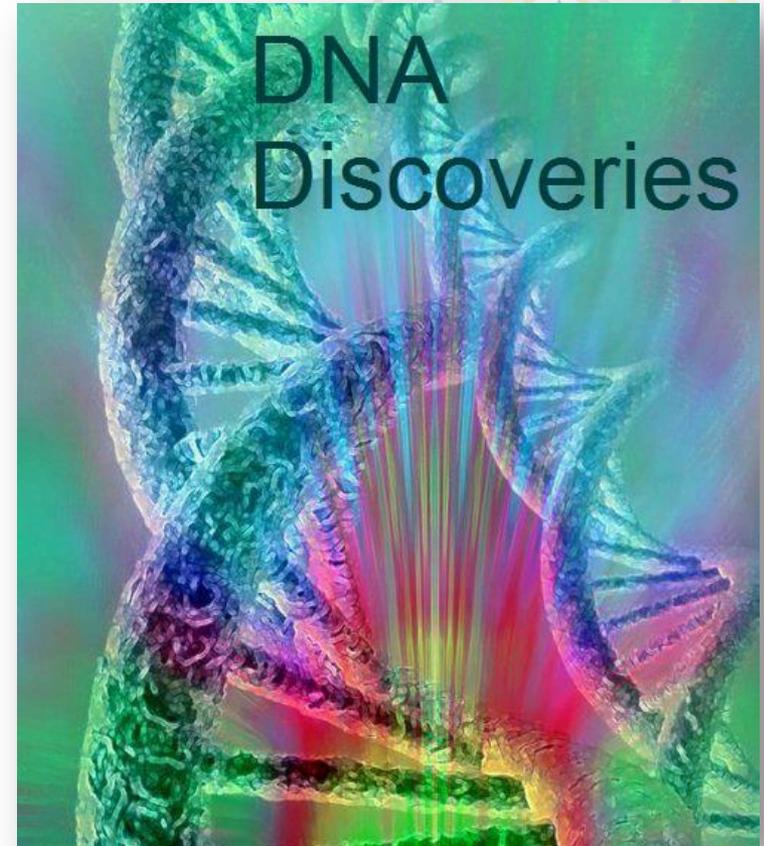

According to Russian researchers, linguists and geneticists, DNA is not only responsible for the building of our body but acts as data storage and communication pathway.

The Russian linguists found that the genetic code within the introns (junk DNA) adhere to the same rules as all our human languages.

# DNA: The Biological Internet

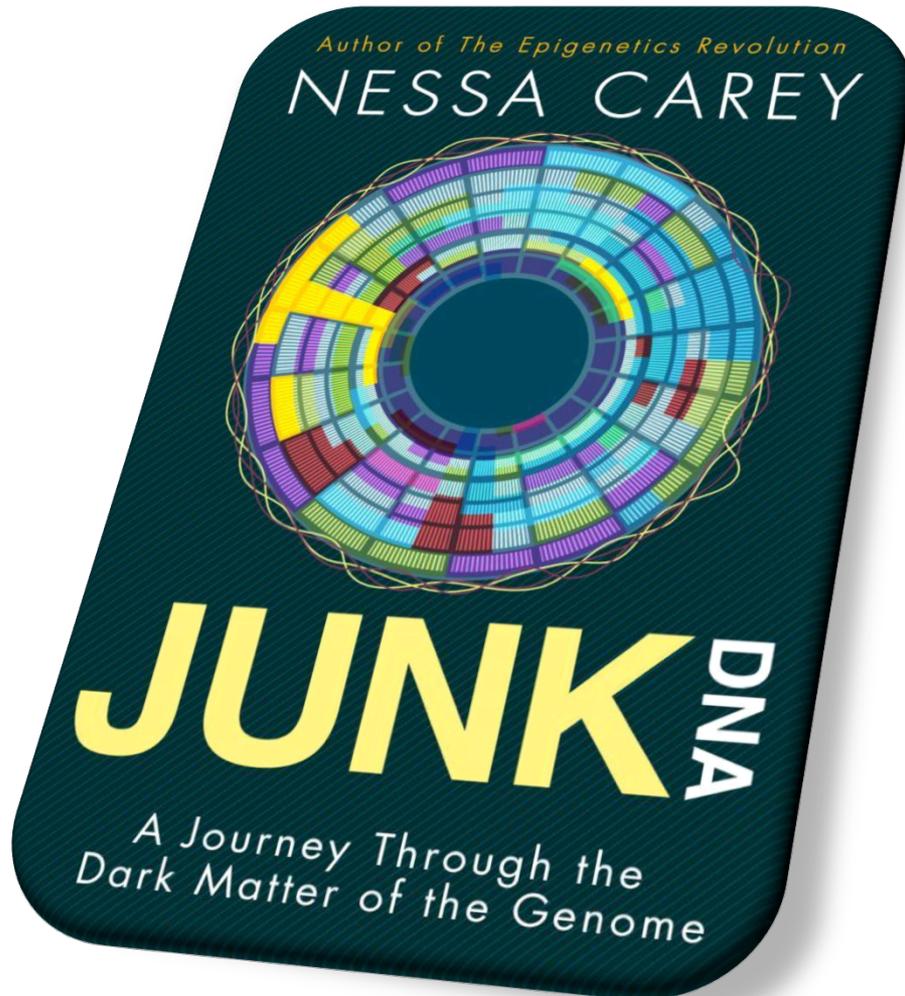

Fosar and Bludorf examined these results and stated:

"Living chromosomes function just like solitonic (scalar)/holographic computers using the endogenous DNA laser radiation."

# Introns (Junk DNA)

These stretches have been referred to by most scientists as “introns” or “junk DNA,” mainly because they have not figured out what secret message it conceals.

# It's not "Junk" after all!

Overall, the nonprotein-coding regions of the genome function like an operating system in a computer, which can direct multiple operations simultaneously.

Contrary to being called "junk", as materialistic theories of evolution assumed, the nonprotein-coding DNA directs the use of other information in the genome, similar to an operating system directs the use of information contained in various application programs stored in a computer.

# DNA Reprogramming

While the Human Genome Project decoded the “machine language” code of the DNA molecule, Russian scientists discovered the higher-level language present in DNA.

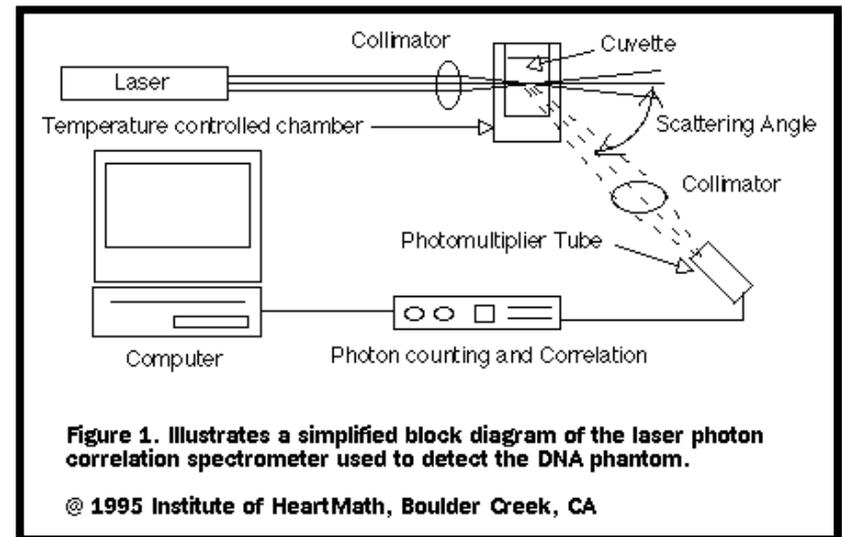

Garjajev’s group discovered that DNA could be altered.

# The software of the human genome can be reprogrammed.

Studies confirmed that the triplets in the DNA sequence are able to exchange places.

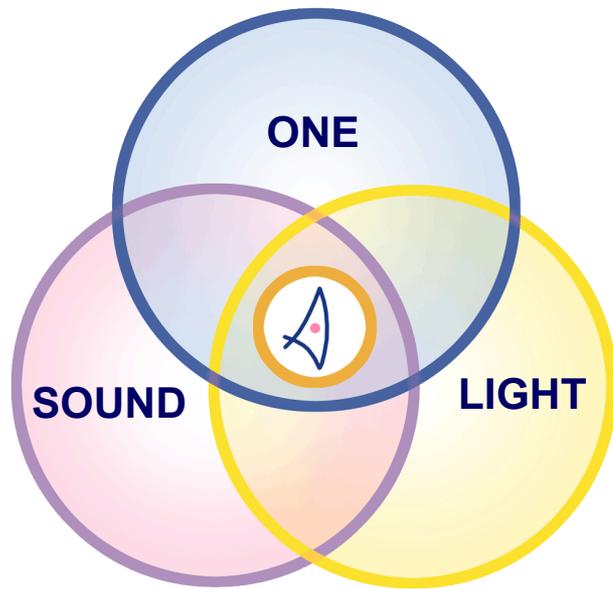

As western scientists cut and spliced single genes from the DNA strands, Garjajev's group actively worked on devices that can influence the cellular metabolism through suitable modulated radio and light frequencies and thus repair genetic defects.

# There is NO knowledge outside of Experience!

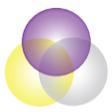

- A self-regulatory approach to healing requires constant experimentation and exploration.
- The proof is in the experience.

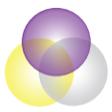

# ASD Case: A 14 yr. old boy

- This youth had previously been diagnosed with 3 specific learning disabilities (in reading, writing and math), anxiety, depression, having sensory integration challenges, and as being on the Autism Spectrum.
- **School phobic behaviour reduced dramatically** –
  - Within a month the battle royale about going to and staying at school began to diminish.
  - Within 6 weeks, the phobia about attendance had disappeared, although it's fair to say the youth still doesn't enjoy school, and morning routines include sometimes being 5 or 10 minutes late. Still, the emotional drama is no longer present, the youth leaves in a good mood, and is no longer hours or days late. There are no longer regular tearful phone calls to mum, begging to come home.

# ASD Case: A 14 yr. old boy

- **Academically** – After 12 months of being in the scalar frequencies (just playing 24/7 – not with listening to the frequencies or doing voice assessment sessions – these proved too challenging, from a sensory point of view), the youth was re-tested by the school. It was a mini-assessment, to update the psych assessment of 3 years ago, and to better plan for high school programming.
- The youth was now functioning academically within the normative grade range. Learning disabilities were no longer apparent, academically. Plans were made to begin re-integrating the youth back into the regular classroom setting.

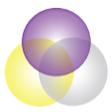

# ASD Case: A 14 yr. old boy

- **Autism spectrum behaviours** - The child has become more loving and affectionate. After a long history of having massive challenges with processing their behavioural difficulties after-the-fact (i.e. being able to communicate what had happened that led up to an incident at school), this youth has begun to be able to retrospectively verbalize the string of events which culminated in an incident.
- This includes the child now being able to identify feelings (their own and, with some support, the other child's). Apologies now seem to include genuine remorse, rather than being rote statements of apology. These appear to be improvements in the youth's theory of mind capabilities.

# ASD Case: A 14 yr. old boy

- **Emotionally**, there's been a great deal of maturing over the past year and a half. Those old intense emotional storms now seem to be a thing of the past, as are the past comments suggesting suicidal ideation.
- There are still autistic spectrum challenges this youth shows in daily life. Some of these continue to be sensory based. (However, even here changes have been noted – the child will now experiment with trying some new foods – a previously unheard of possibility). And anxiety is still challenging with new experiences.

# ASD Case: A 14 yr. old boy

- **Summary** – All these observational changes occurred within a year and a half of being exposed to the presence of our scalar vortex technology, 24/7. No other changes/accommodations were made (which hadn't already been made before *-without these results*), which could account for such profound changes.
- This youth's life trajectory and possibilities in growing up have been expanded dramatically. The only difference seems to have been introducing this youth to living within the field generated by the scalar vortex technology (without even listening audibly to the frequencies, or doing voice assessment sessions for balancing frequencies).
- These results, of course, are only one child. And yet, how extraordinary is this – and how hopeful too - for those who may be struggling with neurologically based differences, such as those seem in people diagnosed with autism and learning disabilities.

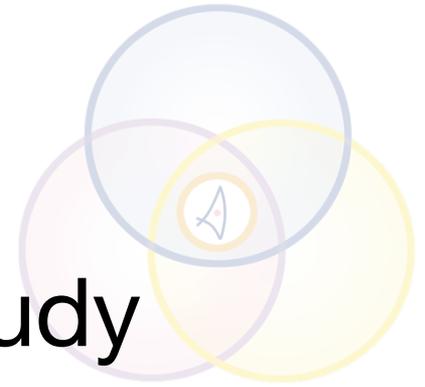

# ASD Case: B

## 7 yr. old boy

- **Summary** – Diagnosed at 3yrs with ASD, non-verbal.
- Within 4 weeks of being exposed to the scalar vortex field, listening to his personal frequencies audibly 30min per day.
- Boy is making different tonal melodies, can say “Papa” and is attempting to speak.
- Tongue movement, understanding and imitating more.
- Sleep better

## 2. Stress Index

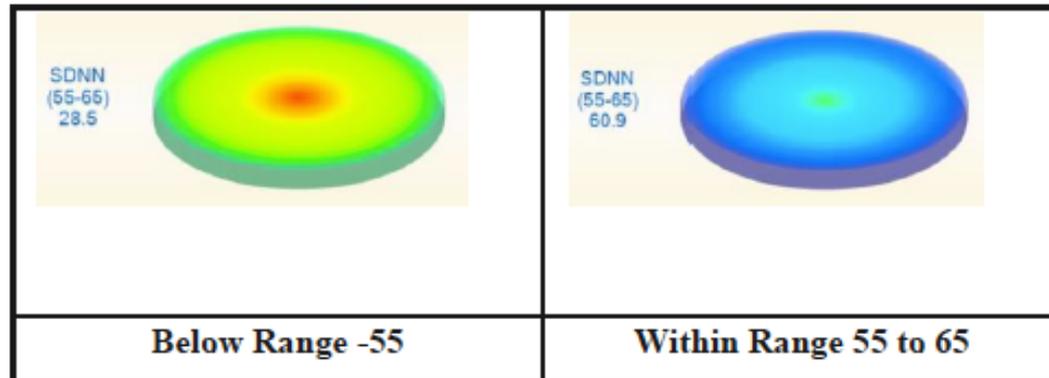

How hard does the nervous system of the body have to work in order to achieve balance? 500 or over is a more critical issue. Lifestyle changes must be implemented.

Score \_\_\_\_\_

## 4. SDNN

SDNN stands for “standard deviation of all normal RR intervals”, those measured between consecutive sinus beats. This reflects your ability to respond quickly, dynamically and effectively to a crisis. Normal range is 55-65. The higher the range the better. This number is increased by proper physical activity, decreased toxicity, stress reduction and balanced fatty acids.

## 11. Spectrum of Brain Wave Activity

When looking at the electrical activity of the brain we are looking at the output of neurons in the cortex of the brain generating electrical activity. This is not an actual EEG but is a mathematical algorithm coming from the ECG of the heart to give us an approximation of brain activity. This analysis will break down this information into various frequencies that can tell us about different states of arousal. These are the Delta, Alpha, Beta, and Gamma (high Beta) waves.

**Delta** is related to sleep and brain stem functions. When high it can indicate white matter damage (brain injuries of all types), or sleep abnormalities. It should be the highest of the component bands. When it is abnormally higher than the other bands, it indicates an imbalance. You may feel sleepy, dreaming, detached awareness, depression.

**Theta** is related to memory, emotion, and emotional brain, (limbic system) functions where emotional memory is housed. Theta can be involved with being drowsy, deep relaxation, problem solving. Increased with catecholamines such as dopamine, epinephrine (adrenaline), norepinephrine. Can be associated with psychosis, spacing out.

**Alpha** is related to the brain at rest or routine activities. Can indicate processing incapacities. This can be elevated in experienced meditators. Sometimes can indicate depression or too much "idling" of the brain. Alpha is increased with relaxation, meditation, creative visualization and increases serotonin.

**Beta** is related to activation and processing in the cortex of the brain. It can indicate over processing where the brain is ruminating. It can also show up with anxiety. Beta increases when alert, concentrating, cognition, restlessness, stressed, anxiety.

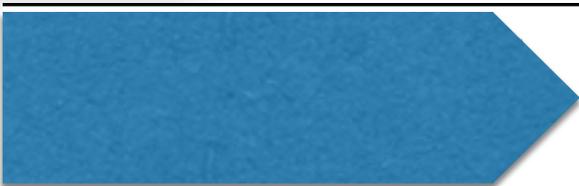

**High Beta** shows up with headaches, anxiety. On the Heart Quest it shows up as Gamma but it is in the High Beta frequency range.
